Phoenix is a Windows XP/2003/2008/Win7 application and **requires** Windows experience prior to attending either course. The Fundamentals course is preferred before the System Administration course. All courses are held in Round Rock, Texas unless otherwise noted.

The Fundamentals Training course contains two components: Monday is dedicated to Operator Training. Tuesday-Friday will focus on Data Entry required to commission the system and administrator applications necessary to maintain system integrity and customize the software. Examples of your data printouts should be brought to class.
